SUZ is in a rural or country setting away from  
major population centers. The place is not for people  
to live but to carry out activities that  
people would get in the way of. People are here,  
but it's their job, & they wouldn't be here if they  
didn't need to be.

70/2 impression that inside are moving parts. Sense that emanations involved are like "waste" secondary, though with proper engineering application could be made of them.

5 1/2 unit is what it does by itself. Connected  
with something, integral with something.

Such doesn't seem to be a weapon, but involves input part  
technology + processes for developing components of  
something.
